PROFESSIONAL SUMMARY

Informatics Engineering graduate (S.Kom/Bachelor of Computer Science) with a strong focus on Software Quality Assurance (Manual Testing & Automated Testing). Possessing experience in designing comprehensive and detailed test scenarios, executing testing for Web and Mobile platforms, and leveraging various manual and automated testing approaches and tools to ensure application conformity and optimal user experience.

EXPERIENCES

QA Tester Engineer Internship (MagangHub Kemnaker 2025 Batch II) - PT. Ragdalion Revolusi Industri

November 2025 – May 2026

- Designed and executed test cases for functional, UI, and cross-platform (Web & Mobile) testing across various enterprise modules (LMS, BMS, FOM, CRM, HRIS) and template-based manufacturing products.
- Developed Automated Testing scripts using Katalon Studio for LMS, FOM, and BMS modules based on established test cases to optimize regression testing efficiency and ensure feature stability.
- Managed API-based integration testing between internal systems and the client's Odoo platform to ensure seamless data exchange across systems.
- Documented and tracked centralized bug findings using Notion/Google Sheets, and proactively collaborated with Business Analysts (BA) and Developers to analyze the root cause of each issue.
- Coordinated with the DevOps team on environment management (Local, Dev, Staging, Production) and Merge Request (MR) approvals to maintain system stability during releases, supported by daily progress reporting.
- Achievement: Successfully completed the internship program with a "Very Good" predicate (Score: 83.75) and obtained an official Software Quality Assurance competency certificate.

QA Tester Manual Internship - PT. Guitekno Tresna Telekomunikasi

October 2024 – April 2025

- Analyzed registration data requirements with the Event Team and conducted visual (UI) testing to ensure the registration website's appearance aligned with LahTube's brand identity.
- Executed comprehensive functional testing on the website registration flow to validate form input, error handling, and ensure no redundant processes or data storage.
- Performed authentication integration testing to ensure the smooth operation of the Single Sign-On login feature, requiring participants to use their LahTube application credentials.

- Acted as the technical communication bridge between the Event Team and Developers by identifying, documenting, and reporting bug findings directly and structured to accelerate system fixes.
- Achievement: Successfully completed the internship and ensured the smooth operation of the registration site for over 500 participants, achieving a zero major bug incident rate throughout the event.

PROJECTS

Learning Management System (LMS)

Managed end-to-end testing for the PT Ragdalion Revolusi Industri internship project by designing test cases from scratch, executing manual testing, and building automation testing scripts using Katalon Studio. Updated test cases in parallel with feature updates, tracked bugs via Google Sheets, and monitored real-time push deployment status to Dev/Staging environments via Discord bot integration to expedite technical collaboration with Developers.

Budget Management System (BMS)

Performed QA and integration testing on a PT Ragdalion Revolusi Industri project by optimizing 80% of legacy test cases. Executed manual and automation testing via Katalon Studio to validate core functionality and ensure the accuracy of data exchange between the internal BMS and the client's Odoo platform.

Financial Order Management (FOM)

Executed functional and integration testing for a PT Ragdalion Revolusi Industri project using both manual and automated testing approaches (Katalon Studio). Validated the main transaction flow connecting the QOM and ARP modules, ensuring accurate and non-redundant data transmission between FOM and the client's Odoo platform.

HRIS System (Web & Mobile)

Conducted intensive cross-platform manual testing on PT Ragdalion Revolusi Industri's integrated HRIS ecosystem. Validated end-to-end business flow synchronization, ensuring requests from the Mobile application (e.g., Maternity Leave and Overtime) synchronized perfectly with the approval processes on the Web dashboard.

Manufacturing Maintenance System (Web & Mobile)

Executed cross-platform functional testing on a template manufacturing application during the internship at PT Ragdalion Revolusi Industri. Ensured the stability of the three main feature pillars (Checklist, Corrective, Preventive Maintenance) and validated customization alignment with client requirements.

Customer Service Chatbot Web Application

Designed, built, and tested a chatbot application as a personal thesis project. Developed the front-end using React Vite, designed the user interface (UI) via Figma, and implemented the back-end using Node.js to handle user authentication and CRUD operations. Conducted comprehensive functional and usability testing to ensure a user-friendly system and optimal user experience.

Online Grocery E-Commerce Web Application

Served as QA Tester in a 5-member development team for a university Web Programming academic project. Managed the planning and execution of functional manual testing on the e-commerce platform to validate business flow compliance. Documented all bug findings using Google Sheets to ensure application quality and support timely project completion.

E-Wallet Application – UI/UX Research & Design

Conducted user needs research, literature review, and UI/UX design for an e-wallet application as part of a university academic project. Collaborated within a team to design an intuitive UI using Figma and executed usability testing to validate system flow convenience and optimize user experience.

Lovebird Disease Diagnosis Expert System

Collaborated in a team to develop and test an Expert System for a university academic project. Designed and implemented a rule-based inference engine and compiled a knowledge base based on expert data. Fully responsible for executing manual testing on the UI component to ensure accurate instant diagnosis results and system navigation ease.

EDUCATION

Bachelor of Computer Science (S.Kom) – Informatics Engineering

August 2021 – November 2025

- GPA: 3.65/4.00
- Relevant Coursework: System Testing & Implementation, Human-Computer Interaction, Expert System, Web Programming.
- Final Project/Thesis: Implementation of the Cosine Similarity Method as an NLP-Based User Assistance System in the LahTube Application.

Merdeka Student Exchange Program (PMM)

6th Semester - 2024, Khairun University, Ternate, North Maluku

- Appointed as Vice Chair / Daily Executive Board (BPH) to lead coordination activities for 94 PMM participants from various Indonesian universities, managing inter-party communication, negotiation, and problem-solving.
- Actively involved in the Publication, Decoration, and Documentation (PDD) Team to produce and ensure the quality of visual content for Nusantara Module activities, maintaining a high level of attention to detail.

SKILLS & TOOLS

Testing Methodologies: Manual Testing, Automation Testing, Functional Testing, Integration Testing, End-to-End (E2E) Testing, Usability Testing, API Testing, Cross-Platform Testing (Web & Mobile), Regression Testing.

Testing Tools: Katalon Studio, Postman, Playwright (Self-Studied).

Project Management & Design: Notion, Google Sheets, Discord, Figma, Trello
